AllerAir Industries

The 6000 EXEC

All-purpose air- purifier for large home and office

The high efficiency filtration system which delivers the clean air you need to ensure good health on a daily basis.

Carbon filter

- 22 lbs of granular activated Mac-B carbon bed adsorbs noxious gasses and odors.

HEPA filter

- HEPA is warm rolled to prevent cracking at folds.
- Laser tested to ensure integrity.
- Traps 99.97% of particles as small as 0.3 microns.

Pre-filter

- Easy and quick to clean or change.
- Pre-filters prevent large particles from reaching HEPA and Carbon filters so as to prolong their life.

Robust all-metal housing

- Baked-enamel housing ensures that no harmful vapors are released.
- 18 gauge steel.
- 4 casters for easy maneuverability.
- Cylindric shape maximizes airflow.

400 cubic feet per minute fan

- 3-speed fan is effective for up to 1800 square feet.
- Turbo setting changes air every 30 minutes.

Options

- Quick-A-tach' positive and negative air attachments available.
- Vocarb version available.
- UV option available.

Use the AllerAir 6000 Exec to clean the air in your office and home and fight the growing problems of asthma and allergies

Adsorb Chemicals, gasses and Odors:
- Airborne chemicals
- Mold toxins
- Paint fumes
- Cleaners
- Solvents
- Furniture glue
- Carpets
- Plastics
- Insulation materials
- Printer emissions
- Cigarette smoke

Traps particles:
- Pollen
- Dust
- Dust mites
- Pet dander

The 6000 EXEC
22 lbs. of activated carbon, combined with true HEPA

Shipping Weight: 54 lbs

AllerAir Industries

The 6000

All-purpose air- purifier for large home and office

Our Mac-B carbon filter absorbs harmful gasses and odors before you do

In Western industrial nations, chemicals have replaced bacteria and virus as the biggest threat to our health.

Though our bodies have defenses against most particles, we are not protected from the airborne chemicals, odors and gasses.

Most domestic purifiers only protect you from particles. They spray a few grams of carbon on mesh, but that's simply not enough.

Activated carbon is the material the military uses for their gas masks.

AllerAir purifiers are successfully used in hospitals, dental clinics and operating rooms.

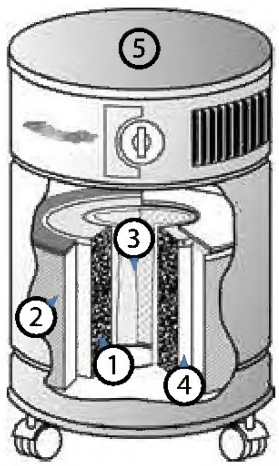
An effective air purifier increases the quality of your life, so invest in an AllerAir unit today.

22 lbs of Mac-B carbon filter bed ①

- Our activated carbon can trap up to 60% of its own weight in gasses and odors.
- Sprayed carbon on mesh only traps a small amount of gasses and odors for a short length of time.
- More carbon will effectively trap more pollutants.
- Activated carbon can only adsorb till it reaches capacity, the AllerAir 6000 Exec supplies 22 lbs of Mac-B Activated carbon for effective long term gas and odor absorption.

HEPA filter ②

- Our HEPA filter traps airborne particles such as dust mites, pollen, mold and pet dander.
- Traps 99.97% of particles as small as 0.3 microns.



Cleanable pre-filter ③

- Pre-filters stops particles from reaching the HEPA and carbon filters, so as to prolong their life.

2 anti-microbial filters ④

- Inhibit the growth of bacteria and virus.

Cylindrical shape maximizes air flow

- Metal housing with baked enamel-finish.
- Units encased in plastic may be cheaper, but the plastic releases hazardous vapors into your air.
- Air flows through the filters and is then circulated out through the top in your chosen direction.
- Clean air avoids mixing with the contaminated air by the space which separates the vent from the filters and the heavier weight of chemicals which pull them down.

Effective for up to 1800 square feet

- Motor runs at any one of 3 chosen speeds to allow rapid room cleaning or quiet overnight use.
- Turbo setting changes air every 30 minutes.

A powerful air cleaning system that removes noxious gases and odors as well as particles from the air you breathe
